CountMeInTT.com – Primary School Implementation Guide (2 pages)

A free, classroom-friendly math fluency routine for Standards 2–5

Always free for students, parents, and schools.

1) What is CountMeInTT?

CountMeInTT is a web-based multiplication fluency game where students complete timed grids for speed and accuracy. Students compete against their personal best, and classes/schools can use leaderboards to motivate consistent practice.

2) Why schools use it

• Builds multiplication recall (accuracy first, then speed).
• Boosts focus and exam readiness through timed practice.
• Creates visible progress evidence without extra marking.
• Helps identify weak tables quickly by observing where students slow down.
• Works as a 10-minute weekly routine (or more if you choose).

3) The simplest weekly routine (10 minutes)

Run it once per week per class. Two attempts only: 1 practice + 1 official.

Level	Recommended grid
Standards 2	5×5 (Quick) — confidence entry point
Standard 3	5×5 → 5×12 (Trainer) — team-based works best
Standard 4	5×12 → introduce 12×12 (Classic)
Standard 5	5×12 + relay across grids (5×5 → 5×12 → 12×12 → 15×15)

4) Setup checklist (teachers)

1. Open the site on any device: laptop, desktop, tablet, or phone.
2. Choose the grid for your class level.
3. Students submit: Name + School + Class Level (email optional).
4. If you have limited devices: use teams, rotations, or a relay format (see Page 2).

Tip: If students are anxious, start with team play (5 students per team) and assign a helper to call out/confirm answers.

Teacher Quick Card (reference)

Count Me In TT - Math Fluency

Teacher Quick Card (std 2-5)

10 minutes weekly. Fluency + progress evidence with minimal marking.

Why it helps?

- Students repeat to beat their own time (built-in motivation).
- Timed play builds focus, speed, and exam readiness.
- Quickly spot who is fluent vs. struggling.

The Easiest 10-Minute Routine

1. **Choose grid by level**
   - *Std 2: 5 x 5*
   - *Std 3: 5 x 5 → 5 x 12*
   - *Std 4: 5 x 12 → 12 x 12*
   - *Std 5: 12 x 12 + relays*
2. **Run two attempts**
   - *1 practice + 1 official attempt*
3. **Submit**
   - *Name + School + Class*

Assessment Without Stress

Grade growth, not speed:

- **Participation:** Completed all-correct
- **Progress:** Improved from baseline
- **Consistency:** Weekly attempt logged

What You Get as a Teacher

- Track Fluency, no worksheets
- Access to your students' submissions
- Weekly Player Report & Monthly Performance Report

SCAN & PLAY

No extra workload:

Just run the weekly attempt and encourage students to beat their own best time.

Page 2 – Running it with limited devices + reporting

5) If your class has only 1–3 devices

You can still run CountMeInTT with a class of 20–30 students. Use any of these formats:

A) Team Rotation (recommended)
Split class into 4–6 teams. Each team sends 1 player to the device for the official attempt while teammates help quietly. Rotate until each team has 1 official time recorded.

B) Relay Challenge (high engagement)
Teams of 4. Each student completes one grid in order: 5×5 → 5×12 → 12×12 → 15×15 (Std 5) or stop at 12×12 (Std 4). Total team time = sum of the four submissions.

C) Station Day (10-minute centres)
Set a CountMeInTT station once per week. While the rest do independent work, small groups rotate through the station.

D) Whole-Class Showcase (with projector)
Use one projected device for a quick head-to-head. Then allow 5–10 students to submit official attempts while others watch and learn.

6) Assessment without stress (grade growth, not speed)

If you choose to attach marks, use low-stakes criteria that reward effort and improvement:
• Participation: completed an all-correct grid (official attempt logged).
• Progress: improved from baseline time over 3–6 weeks.
• Consistency: weekly attempt logged (even on ‘off’ days).

7) What you get back (reports & visibility)

CountMeInTT can provide teacher/principal-friendly summaries such as: number of attempts per class, active students, fastest times, most improved, and weekly engagement. This supports evidence-based conversations with parents and leadership.

8) Support, demos, and school leaderboards

Schools can request a live demo session (1 hour) and optional school/class leaderboards. CountMeInTT is designed to be plug-and-play with minimal workload for teachers.
